PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience developing enterprise-scale web and cross-platform applications using Angular, TypeScript, Ionic, and Capacitor. Strong experience in component-based UI development, reusable and modular components, RxJS, NgRx state management, responsive interfaces, role-based access control, authentication, and unit testing. Experienced in delivering scalable frontend solutions, optimizing application performance, and collaborating with Agile/Scrum teams to build production-ready applications.

TECHNICAL SKILLS

Core Competencies: Angular (v7–v20), Ionic,Capacitor, TypeScript, JavaScript (ES6+), Java, HTML5, CSS3/SCSS.

UI Development: Storybook,RXJS, NGRX Sate Management, Responsive Web Design, Angular Material,

Testing & Tools: GraphQL, Jasmine, Karma, SonarQube, Postman, Agile, Scrum, CI/CD,Docker, GitHub, Git, Copilot, MySQL Workbench

WORK EXPERIENCE

NEC Software Solutions – Software Engineer Bangalore, India

1. **Public Safety Platform (Irish Fire UK)** *Jan 2026 – Present*
   - **Mobile Application**
     - Built a cross-platform mobile app with Ionic, Angular, and Capacitor, delivering modular, reusable components for Android and iOS.
     - Implemented offline-first capabilities using SQLite and synchronization services, enabling task creation/updates during network interruptions.
     - Integrated Firebase Cloud Messaging (FCM), custom native plugins, and Leaflet maps for real-time alerts, location tracking, and operational awareness.
     - Developed local notification workflows and responsive Ionic UIs tailored for field staff in low-connectivity environments.
     - **Tech Stack:** Ionic, Angular, Capacitor, TypeScript, SQLite, Firebase Cloud Messaging (FCM), Leaflet, Cross-Platform Development, Android, iOS.
   - **Console Application**
     - Architected an enterprise-grade administrative web application in Angular using component-based architecture, delivering the User Maintenance, Organization Management, and Module Management modules.
     - Implemented secure authentication and RBAC via MSAL, Azure Active Directory, and Angular route guards to protect application features and modules.
     - Established centralized state management with NgRx Store/Effects and built responsive Angular Material & Bootstrap UIs for a consistent user experience.
     - Delivered auditing functionality for compliance/traceability and authored unit tests (Jasmine, Karma) within an Agile/Scrum workflow.
     - **Tech Stack:** Angular, TypeScript, Angular Material, Bootstrap, NgRx, MSAL, Azure Active Directory, RBAC, Jasmine, Karma.

2. **KMD Workforce & Enterprise Solutions (KMD Denmark)** *Aug 2023 – Jan 2026*
   - **Supplier Compliance** *Nov 2024 – Jan 2026*
     - Built scalable Angular 16 UIs using component-based architecture, RxJS-driven reactive flows, and NgRx Store/Effects/Entity for state management.
     - Configured Keycloak authentication, secure routing, and role-specific UI visibility for multiple user personas.
     - Managed async UI flows, backend-triggered events, and real-time workflow updates using RxJS Observables,Subjects, and Operators.
     - Integrated GraphQL APIs, BPMN workflows, and Kafka events to power dynamic forms and real-time workflow updates, visualized via NgX-ECharts dashboards.
     - **Tech Stack:** Angular 16, TypeScript, RxJS, NgRx, Storybook, GraphQL, Keycloak, NgX-ECharts, Jasmine, Karma.

- **Document Management System** *Sep 2024 – Jan 2026*
  - Built responsive, accessible, cross-browser Angular 16 UIs and enforced RBAC via Keycloak for document type permissions and metadata.
  - Extended a Storybook component library and refactored complex Angular components to boost performance and maintainability.
  - Resolved SonarQube-flagged bugs/vulnerabilities and wrote unit tests (Jasmine, Karma) to strengthen code quality and stability.
  - **Tech Stack:** Angular 16, TypeScript, Storybook, GraphQL, Keycloak, RBAC, Jasmine, Karma, SonarQube.
- **Special Allowance Agreements (SAA)** *Aug 2023 – Sep 2024*
  - Built a scalable, component-based Angular 16+ frontend for KMD Vagtplan, supporting complex duty planning and payroll rule management.
  - Implemented reactive UI flows with NgRx/RxJS and configured Keycloak-based role access and session management for multiple user personas.
  - Integrated GraphQL, BPMN workflows, and Kafka events for dynamic forms and live workflow actions, maintaining a shared Storybook component library.
  - **Tech Stack:** Angular 16+, TypeScript, NgRx, RxJS, Storybook, Jasmine, Karma, GraphQL, MySQL Workbench, Postman.

3. **HCM Storybook Component Library** *Aug 2023 – Dec 2025*
   - Designed and developed a reusable, component-based Angular library comprising commonly used UI components with comprehensive documentation to support cross-team adoption.
   - Implemented interactive previews using Storybook for seamless component testing and documentation.
   - Published library to private artifact registry using Git-based version control, enabling consumption across multiple applications.
   - Significantly reduced code redundancy while promoting modular design, consistency, and reuse across enterprise projects.
   - Tech Stack:Angular, Storybook, Type-Script, Artifact Registry

EDUCATION

Bachelor of Engineering in Computer Science June 2019 – June 2023
AMC Engineering College, Visvesvaraya Technological University Bangalore, India
